E. E. GRAVES,

G. L. PILLSBURY,

*Trustees.*

## SCHOOL REPORT—TOWN DISTRICT.

---

During the past year six teachers have been employed in our schools. Only two of these were teachers of much experience. Two had never taught before.

We were very much disappointed in one of our experienced teachers, who taught at North Water street. She seemed to be doing very good work and giving satisfaction to most of the parents.

About four weeks before the time for her school to close, she notified the school board that she should be obliged to leave on account of ill health. As she began to teach in Lyme, N. H., a few days after she left here, we concluded she was a person on whom we could not depend.

In all other sections of the district the same teachers have been retained during the school year. We think they have all tried to do their best, and all things considered have succeeded very well.

We have tried to economize in all possible ways.

By uniting two of our small schools during the year and two more during the summer term, the expense has been much less than it would have been if we had maintained schools in the six sections of the district during the year.

One difficulty in uniting schools seems to be in securing some one to convey pupils from one section of the district to another, for a reasonable sum.

Another difficulty is the opposition of some parents who say they will not allow their children to be carried to other schools.

Favorable results have been secured in many places by uniting small schools. Besides lessening the expense, the attendance is generally improved and tardiness is unknown.

We have more names than usual on the roll of perfect attendance. This is encouraging. Yet our registers show that there must be a large number of unnecessary absences. We think this is more the fault of the parents than of the children. Our school year is so short that parents should not allow their children to be absent for any trivial reason.

We have had twenty-six weeks of school, and could have had several weeks more if we had known just how much money we were entitled to in season to have planned for its use.

The trustees of the Academy fund furnished the Plain school with wood for several weeks, without expense to the district.

Our school year is too short and our vacations too long. From the last of December until the middle of April is a long time for our children to be without school privileges. It is hoped something will be done to remedy this.

The remaining members of the school board deeply feel the loss of Rev. A. C. Hurd, who always took a lively interest in the affairs of the district.

Respectfully submitted,

GEORGE W. FISHER,

MRS. ALLA J. CARTER,

*School Board.*

## REPORT OF THE BOARD EDUCATION.

---

### *Penacook District.*

The results of the school work for the year are very gratifying, notwithstanding more sickness than usual among the pupils.

The plan, adopted two years ago, of grading the school and following the same course of study as the Concord schools, has proved a perfect success.

Miss Mina E. Pike, in charge of the primary department, has the two first grades and a kindergarten class. Miss Pike is well known as one of the best of teachers, and conducts the school in a manner that leaves nothing to be desired.

Miss Susie A. Hall has for several years taught the intermediate department, in which there are three grades. This department furnishes an illustration of the benefits derived from continuing the same teacher in charge of a school from year to year, and gives evidence of wise and thorough instruction.

The degree of success attained by Miss Lucy E. Warner as principal of the school and teacher of the grammar department, proves her to have been both conscientious and efficient. This department has suffered severely from a too frequent change of teachers and a consequent lack of system; but we are pleased to note a decided improvement in its condition, as the result of infinite patience and hard work on the part of the teacher.

We have endeavored to improve the tone of the school, and find that grading it has accomplished this in a measure, by making the work more interesting, and appealing to the pride and ambition of the scholars.

Our children need the intellectual stimulus, as well as the other advantages, that a High school in the place would afford.

Every experienced teacher knows that a district school invariably reflects the intelligence and morals of the community in which it exists.

Nor should we forget that the best school advantages will not atone to our children for the lack of wise home discipline and inspiration.

"Behold, a sower went forth to sow ;" and the amount of fruit produced from the seed depended upon the condition of the soil upon which it was sown. Let the owners of the ground beware of the thorns, the rocks, and the birds of the air ; and be sure that the soil is made rich and receptive ; and, as ever, the seed that is sown on good ground will spring up and bear much fruit.

Respectfully submitted :
